

Java Final Year Projects - Enhanced Guide (Highlighted Top 5)

1. Smart Attendance System with Face Recognition

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

2. Online Blood Donation Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

3. Cyberbullying Detection System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

4. Job Portal with Skill Matching

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

5. Emergency Alert System for Women Safety

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX

3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

6. E-Learning Platform with Video and Quiz Integration

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

7. Crime Reporting and Tracking System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

8. Online Voting System with Voter Authentication

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

9. Online Book Recommendation System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

10. Waste Collection Scheduling System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

11. Digital Queue Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

12. Online Complaint Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX

3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

13. Hostel Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

14. Insurance Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

15. Railway Reservation System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

16. Online Gas Booking System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

17. Student Result Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

18. Online Event Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

19. Parking Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX

3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

20. Loan Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

21. Personal Expense Tracker with Analytics

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

22. Online Banking System with Transaction History

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

23. Stock Portfolio Tracker with Alerts

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

24. Loan Eligibility Predictor

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

25. Digital Wallet System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

26. Online Doctor Appointment Booking System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX

3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

27. COVID or Disease Symptom Checker

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

28. Pharmacy Inventory Management

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

29. Health and Fitness Tracker

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

30. Hospital Bed & Resource Management System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

31. Smart Irrigation System (with Sensor Simulation)

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

32. Crop Disease Prediction System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

33. Agricultural Marketplace App

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX

3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

34. Weather-Based Crop Suggestion System

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.

35. Farm Expense & Yield Tracker

Tech Stack:

Java, Spring Boot, MySQL, HTML/CSS, JavaScript

Roadmap:

1. Requirement Analysis
2. Design UI/UX
3. Backend Development
4. Integration & Testing
5. Deployment

Future Value:

Can be scaled for real-world use or turned into a commercial product.
